

Enrollment in a Blackboard Course

1. You are automatically enrolled in a Blackboard course as soon as you register for that course in PAWS. Please remember that some instructors do not use Blackboard for their face-to-face courses so you may not see a Blackboard course associated with every class for which you are enrolled.
2. If your instructor is using Blackboard as a component of the course, confirm with them that they have made the course available to students. If they need help with this, have them call the Help Desk at (301) 687-7777.
3. If your instructor has made the course available to students and it is still not available to you, contact the Center for Instructional Technologies or the Help Desk at the numbers listed above.
