Technology Implementation Evaluation

Dear Tech Reps,

Please discuss the following questions with the Cooperating Teachers in your building and complete your section. Compile the results and send an overview of the responses along with your answers by December 14th. Your results will help in future assessments. Thank you for your cooperation and expertise this semester.

For Cooperating Teachers:

1. Was the intern prepared to use the technology available in the school? Please be specific if the answer is no.
2. Did the intern or you have problems accessing any equipment to complete the projects/lessons?
3. Did your intern have any problems understanding the technology tasks? Please specify problems.
4. Did you have any problems understanding the tasks given to the intern by the university?
5. Did you feel comfortable using the required technology application for the tasks?
6. Was the intern using technology to help assess the students? Please give specific examples.
7. Did you observe the intern using technology as a record-keeping tool and adjust instruction based on student results?
8. Do you use technology as a record-keeping tool? What software do you use?

Tech Reps:

1. Do you think your school would like FSU's assistance in supporting technology mini-sessions or workshops? What types of training would benefit the faculty the most?
2. Would you feel comfortable facilitating and/or presenting mini-sessions for teachers in your school?
3. Do you have any issues that need to be addressed concerning technology in the school?
4. Have you had any problems with helping teachers and interns this past semester?
5. Have you had any problems accessing Blackboard once you had your screen name and password? If we were to have chat sessions on Blackboard, what would be the best time for you to log on?

As always Tech Reps, we are available if you have any questions, please don't hesitate to contact Dr. Cushall at (301) 687-4308 or Dr. Rotruck at (301) 791-4026.
