Device Registration/Air Group Configuration

The psk@FSU network is a pre-shared key network used for televisions, gaming systems or other devices that **DO NOT** have a web browser. All other devices should use the WiFi@FSU network.

The psk@FSU network has a device limit of three devices per user. So be sure that you do not register other student devices under your username.

**You are responsible for all devices registered under your user account.**

To register a device go to [https://cpvip.frostburg.edu/guest](https://cpvip.frostburg.edu/guest). You will be presented with the following page.

You may also register wired devices here as well if they do not have a web browser.

Once you have logged in you will be on the **Manage Devices** page. Click on **Create Device**. You will be presented the following page.
Enter the requested information and click **Create Device**.

If you want to remove a registered device click on **Manage Devices** and click on the device you wish to remove. Click **Remove** and then select **Delete Account** and click **Make Changes**.

You may manage the devices you have connected to this network at any time. You may only have three devices connected at one time.

**AirGroup Configuration**

AirGroup has been configured to work within the residence halls. AirGroup allows devices such as Apple AirPrint, AppleTV, and Chromecast to mirror or cast the screen of another device. These devices are still required to be registered within ClearPass to access the PSK@FSU network.

If you are attempting to use the mirroring or casting feature of your device, the device must be enabled for AirGroup. The device will only be accessible for mirroring or casting if it is a registered device within ClearPass.

The screen shots below show the addition of the AirGroup checkbox within ClearPass. If you’ve already registered your device, you should log back into the device registration system, click on your device, select Edit then click the checkbox next to Enable AirGroup. Click on Update Device to save your settings.
For further assistance, you may contact the Help Desk at 301-687-7777.
