

How do I map a Windows network drive on a Mac?

1. Click on the Finder icon
2. Click the Go menu and choose Connect to Server... The Connect to Server box will come up.
3. Enter smb:// and the path of the drive, then click Connect.

4. The paths for the H, P, and U drives are as follows:

H Drive: smb://fsunas1/usersdir/<username> (Ex: smb://fsunas1/usersdir/kkerns)

P Drive: smb://fsunas1/<department share> (Ex. smb://fsunas1/ITD\$)

U Drive: smb://fsunas1/campus\$
